[Compete Toolbar for Internet Explorer : Free](#)

The Compete Toolbar warns of Web sites with spyware, phishing, and online scams, saves you money when you buy, and helps you discover new Web sites. The Toolbar automatically creates three SnapShot alerts: Trust Score, Site Profile, and Deal Light for every Web site you visit. These alerts lets users know if it is a safe site, how many people visit the site, and if there are any deals that can save them money. Compete online metrics are leveraged by some of the largest companies in the US and often cited in publications like USA Today, Wall Street Journal and The New York Times. Our trusted service partners include: GeoTrust (Verisign), CastleCops, and CouponMountain. Version 2.099 may include unspecified updates, enhancements, or bug fixes.

Microsoft Windows Defender By Microsoft

Customer Rated ★★★★★

Note: This product requires Windows validation. The 'Download Now' link will take you to the Microsoft site for downloading. Windows Defender is a free program that helps you stay productive by protecting your computer against pop-ups, slow performance and security threats caused by spyware and other potentially unwanted software. The worldwide SpyNet community plays a key role in determining which suspicious programs are classified as spyware. Microsoft researchers quickly develop methods to counteract these threats, which are automatically downloaded to your PC, so you stay up-to-date. This latest version of Windows Defender offers a new scanning engine for enhanced performance, simplified user interface and alerts, and support for 64-bit platforms. This product is free of charge for licensed Windows customers. Users of 64-bit platforms should use WindowsDefenderX64.msi. [View full product specification](#)
